The copy filmed here has been reproduced thanks to the generosity of:

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

THE wonderful gold fields now known the world over as the Clondyke diggings, are situated on a branch of the Yukon River, in the Canadian Northwest Territories. Gold was discovered in the Yukon basin in 1881 on a tributary of the Lewis River, during the next few years considerable mining was done on the Hootalinqua, which flows out of Teslin Lake and into the Yukon. Since then gold has been found in paying quantities on Stewart River, Forty-Mile Creek, Glacier Creek, Birch Creek, and last but by no means least, the creeks tributary to the Clondyke.

Forty-Mile Creek is for the most part in Alaska; the headwaters of Sixty-Mile Creek are also in United States territory, Miller, Glacier and Birch Creeks were once thought to be in Alaska, but are now known to be in Canada, and of the wonderfully rich Clondyke there has never been any doubt every inch of it, and all it contains, is in Canada. REMEMBER THAT CLONDYLE, YUKON, IS IN CANADIAN TERRITORY, and that all goods from the United States must pay duty at port of entry. Goods purchased in Canada enter free.

DIFFERENT ROUTES TO THE YUKON.

THE Clondyke may be reached from two directions. One is by ocean steamer to St. Michael's Island in Bering Sea, and thence up the Yukon River. The other is by crossing over the Coast Range of mountains to the head waters of the Lewis branch of the Yukon and descending by boat. The shortest route from Victoria is that *via* the White Pass, and is approximately 1,594 miles.

Another available route to the Lewis River is from Dyea, at the head of Lynn Canal, *via* the Chilcot Pass. This distance is slightly longer than that *via* the White Pass.

A third Route to the Lewis River is *via* Fort Wrangle and the Stickeen River to Telegraph Creek and thence overland by pack train to Lake Teslin.

Still another route is from the head of Taku Inlet, a little south of Juneau, thence overland by the valley of the Taku River to Lake Teslin. The distance to Lake Teslin by this route is approximately the same as *via* the Stickeen route.

Among the many vessels which are engaged in carrying the host of prospective millionaires from Puget Sound to the gold fields of the far North, the fine steamers of the Canadian Pacific Navigation Company are justly entitled to a front rank.

The steamer Princess Louise, which sails from Victoria on August 7th, is a staunch and commodious side-wheeler, provided with all modern conveniences. The steamship Islander, which is billed to leave Victoria on August 15, is of the latest and best construction in every way. She is a twin-screw iron ship, and is expected to make the trip from Victoria to Dyea in 3½ days. She is commanded by Capt. J. Irving, the commodore of the fleet, and those who know him will tell you that if you go under his care you will be well looked after.

CUSTOMS REGULATIONS.

IN order that prospectors may not be disappointed, we wish to firmly impress on their minds that the gold fields are in British territory, and unless supplies are purchased in Canada they *must* pay duty. The Dominion customs regulations apply throughout Canada, and no exception will be made in the case of prospectors entering the Northwest Territory.

Customs officers went North on the steamship Islander on July 29th, with instructions to enforce the law just as strictly in the passes as anywhere else in Canadian territory. (See also page 25).

If he buys his outfit in Victoria, where he can get it just as cheap as in the United States, he has no duty to pay. Mark that point.

RATES OF DUTY.

IN the space of a short article we find it hard to enumerate the rates of duty on every article which goes to make up the outfit of a Clondyke prospector. Suffice it to say that the duties on groceries, clothing, hardware, etc., brought into Canada from the United States will average fully 30 per cent., if not more—that is, a man buying three hundred dollars (\$300) worth of goods in the United States will have to pay about one hundred dollars (\$100) in duty; whereas if he outfits on Canadian soil he will have no duty to pay, and will save lots of vexatious bother in clearing his goods, etc.

MORAL.—Buy in Victoria and save money and trouble.

Prospectors going to the Yukon should bear in mind that one of the most important things to give their attention to is protection against the rigorous winters, and we should strongly advise them to provide themselves with plenty of heavy warm clothing. They will find British made woollen goods to be very cheap in Victoria, B. C., and will find it greatly to their advantage to take a full supply.

A FEW PARTICULARS ABOUT THE CLONDYKE

CLONDYKE is a mispronunciation of the Indian word "Throw-dak," which means "plenty of fish."

Gold was discovered on Bonanza Creek in 1887, by G. W. Carmach.

In 1895, at the station of the North-West Mounted Police, the thermometer first touched zero on Nov. 10th, and last on April 29th. The lowest registered was 65 deg. on Jan. 17th.

"Al-as-ka for a Clondyke cocktail," said a thirsty man the other day as he entered a saloon.

"Certainly, if Yu-kon wait," said the obliging barmaid.

"I will,, replied he, "if it will not Tak-u too long."

### REASONS FOR BUYING IN VICTORIA.

**G**OODS of all descriptions, either for the outfit of the individual miner, or for the trader, no matter how large his order may be, can be supplied in Victoria as cheaply as at any other point on the Coast, and as the goods are destined for Canadian territory it is a direct advantage to buy them in a Canadian city and thereby save the duties.

The best proof of this is the fact that the big American trading companies doing business in the Canadian-Yukon country have been, for the last few years, purchasing the greater part of their supplies in Victoria. If these big United States companies could do as well in their own country would they come to Victoria, Canada, to buy their goods? **THINK.**

The business of the Yukon is open to all the world, but on the same terms, and no others, as the business of the rest of Canada is open. The laws of Canada will be enforced in the whole territory precisely as they are enforced everywhere else. Upon this point there ought to be no mistake whatever.

Miners purchasing their outfits in the United States or elsewhere out of Canada, must pay duty either at Victoria before taking the steamer, or at Lake Tagish, after crossing the Pass. Attempts have been made by interested parties in the United States to create the impression that the Canadian authorities either could not or would not collect duties. This has already caused distress among miners who have spent all their money buying their tickets and outfits. *Goods on which duty is not paid will be confiscated.*

.....  
 Collector of Customs.

Armed with this document the miner has no delays on the Yukon boundary, for on presentation at Tagish Lake to the customs officer the certificate is stamped and he proceeds on his way rejoicing; whereas the other fellow who neglects to get his certificate here is forced to a delay at Dyea or Tagish Lake while his papers are made out, and naturally with such a big rush of people it may be two or three days before he gets away. There are some no doubt who imagine that in some way they will succeed in getting their goods into the Canadian Yukon without paying duty, but they will find themselves grievously disappointed, as the customs laws will be most strictly carried out.

The oldest and most experienced outfitters for prospectors and miners on the Pacific Coast are in business in Victoria—the men who outfitted for Cariboo, Cassiar and Omineca—and know from actual experience just what you want and how to pack it.

## AMOUNT TAKEN OUT

---

### SOME OF THOSE WHO MADE STRIKES ON THE CLONDYKE.

To give an accurate list of those who returned from the North and the amounts they took out would be impossible. Below is given a partial list. The list includes those who came down on the Excelsior and landed at San Francisco, as well as those who returned on the Portland. The list foots up over \$2,000,000. A partial list of strikes reported follows:

# Why I Insured in the New York Life Insurance Company.

## BECAUSE

It is one of the strongest companies in the world.

It has in Assets over - - - - - \$187,176,406

It has in Surplus over - - - - - 26,657,332

It earned for policy holders last year from interest and rents over - - - - - 8,001,482

It is purely mutual, and all of its assets, surplus and earnings belong to its policy-holders.

It has an honorable record of 52 years.

Its policies as now issued contain no restriction as to residence, travel or occupation, habits of life or manner of death.

The **SOLE** condition is that if premiums are paid the Company will certainly pay the policy immediately in the event it becomes a claim by death, and thus leave a widow or an estate a legacy and not a law-suit.

Its policies cannot be forfeited after three years, and if allowed to lapse, the insured will receive the full benefit of his payments either in a paid-up policy, or extended insurance, as he may elect.

You can borrow money from the Company at 5 per cent. per annum, after your policy has been three years in force.

You do not have to **DIE TO WIN**. If you live 10, 15, or 20 years you can settle your policy in any way that best suits your circumstances at the time—for cash, paid-up insurance, annuity, or other options.

It is the most valuable estate you will leave behind you, more certain in its results than lands, houses, stocks, or bonds, as its value does not rise and fall with the market.

You want the very best—the most privileges and the fewest restrictions, whether small or great—and the New York Life's Accumulation Policy furnishes it.

No extra premium on prospectors going to the Yukon.
